

# WT-6051 China standard shoe flexing resistance testing machine

## 1. Introductions

The Chinese standard shoe flexing resistance test machine is used to test the flexing resistance of finished shoes and soles after continuous and repeated bending at a fixed frequency and angle for a long time.

## 2. Relative test methods

GB/T3903.1 footwear—general test methods—flexing resistance

## 3. Specifications

No.	Item	Spec.
1	Test sample quantity	1 pair (2 pcs)
2	Flex angle	10-50° adjustable
3	Flex speed	5-300cmp adjustable
4	LCD counter	0-999999
5	Weight	300kg
6	Voltage	Single phase AC220V 3A
7	Dimension	45x65x150cm
